

PRIME MINISTER

Số.: 898/QĐ-TTg

SOCIALIST REPUBLIC OF VIETNAM

Independence - Freedom - Happiness

Hanoi, 27 May 2016

DECISION

**APPROVING THE ORIENTATION, OBJECTIVES AND DUTIES TO ENSURE THE
CYBER INFORMATION SECURITY FOR THE PERIOD 2016-2020**

PRIME MINISTER

Pursuant to the Law on organization of Government dated 19/6/2015;

Pursuant to the Law on Cyber Information Security dated 19/11/2015;

Pursuant to Decree No. 132/2013 / ND-CP dated 16/10/2013 of the Government regulating the functions, tasks, powers and organizational structure of the Ministry of Information and Communications;

Pursuant to Decision No. 63/QĐ-TTg dated 13/01/2010 of the Prime Minister approving the National Digital Information Security Development Planning by 2020;

Considering the recommendation of the Minister of Information and Communications;

DECIDES:

Article 1. Approving the orientation, objectives and duties to ensure the cyber information security for the period 2016-2020 with the following information:

I. ORIENTATION

1. Reforming and creating the powerful change in awareness and consciousness of compliance with the law on cyber information security of the whole society; mobilizing the social resources, especially from businesses involved in ensuring the cyber information security.
2. Promoting the development of product market and information security services; focus resources to ensure the information security for important information systems; deploying activities to ensure the cyber information security towards harmonious combination between the equipment investment and the application of management measures in accordance with appropriate technical regulations and standards.

3. Strengthening the national cyber information security and developing the adaptability proactively, flexibly and reducing the risks and threats of loss of cyber information (cyber resilience).

II. OBJECTIVES

In addition to the objectives in the National Digital Information Security Development Planning by 2020, the target for the period 2016-2020 is as follows:

1. Creating the powerful change in awareness of information security and the rate of incidents of cyber information security loss because the poor awareness, subjectiveness and carelessness of people is below 50%.
2. Improving the reputation of electronic transactions of Vietnam and removing Vietnam from the list of 20 countries with the highest rate of malware and spam infection in the world as ranked by international organizations.
3. Basically forming the technical regulation and standard system and the inspection and assessment system of information security.
4. Developing at least 5 information security products with Vietnamese brand widely used in domestic market. The Vietnamese enterprises shall play the leading role in the information security services market in the country.

III. DUTIES

1. Ensure the cyber information security on a national scale
 - a) Develop the requirements for ensuring the minimum cyber information security for the national important information system; strengthen the investment to ensure the cyber information security; make periodical inspection and assessment of cyber information security towards the national important information system.
 - b) Develop and update the national technical regulation and standard system on cyber information security; develop and guide the framework model of cyber information security management system in line with the international practices.
 - c) Invest in developing the platform systems to improve the technical capacity to ensure the cyber information security, including: Vietnam Internet attacking processing system; information security assessment and inspection system; electronic national authentication system.
 - d) Improve the capacity and effectively operate the incident rescue coordination network of cyber information security on a national scale.
 - dd) Organize periodical exercises to ensure the cyber information security and participate in international exercises.

e) Improve the capacity to prevent and control malware, improve the reliability of the nation in electronic transaction activities towards socialization.

2. Ensure the cyber information security in activities of organizations and bodies.

a) Develop, issue and regularly update regulations and policies to ensure the cyber information security in activities of organizations and bodies.

b) Apply the cyber information security management system in line with the technical regulations and standards in activities of organizations and bodies.

c) Assign the leadership to take charge and establish or appoint the key department to take responsibility for cyber information security.

d) Raise the awareness of information security for leadership and officials; provide the training in knowledge and skills of information security for officials with relevant responsibilities.

dd) Make investment to improve the technical capacity to ensure the cyber information security for information systems under management.

e) Develop the plan for response to the incidents of cyber information security and carry out the periodical inspection, assessment and exercises in cyber information security for the information systems under management; participate and coordinate in national training and exercise programs.

g) Develop and make plans for contingency and data backup to ensure the continuous activities of bodies and organizations; be ready to restore the normal activities of system after the incident of loss of cyber information security.

3. Develop the market of products and services of cyber information security.

a) Order the study, development and pilot production and make domestic information security products from the science and technology budget.

b) Support the investment promotion, training and development of human resources for medium and small-sized enterprises in the field of cyber information security.

c) Support the trade promotion, market expansion, brand development and promote the use of products and solutions to cyber information security with Vietnamese brand.

d) Support the development of some domestic products and services of cyber information security.

dd) Promote the application of public digital signature in social – economic activities; strengthen the outsourcing of cyber information security services provided by enterprises.

IV. SOLUTIONS
